Before You Begin

1. Check Your Order:

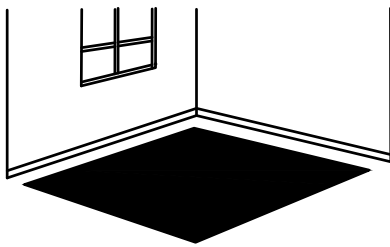

Ensure all boxes have arrived in good condition before starting.

2. Two-Person Assembly:

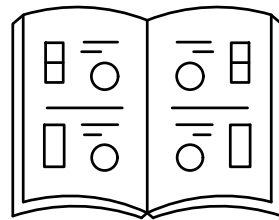

Heavy items require two adults for safe and easy assembly.

3. Prepare Your Space:

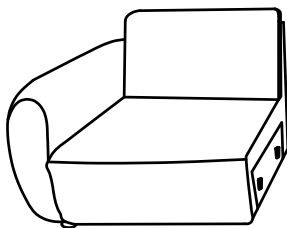

Clear sufficient space for assembly and protect your floor with a mat or cardboard.

4. Read & Organize:

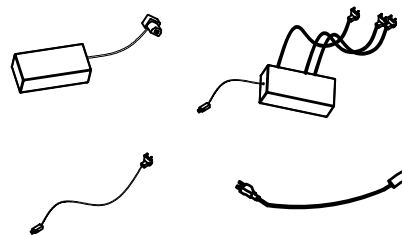

Read all instructions carefully and verify all hardware types and quantities against the list.

5. Inspect Components:

Inspect all sofa connectors and brackets for damage, deformation, or missing parts prior to assembly.

6. Electrical Safety:

DO NOT plug in the power supply if any cables are frayed, split, or damaged.

Friendly Reminder:

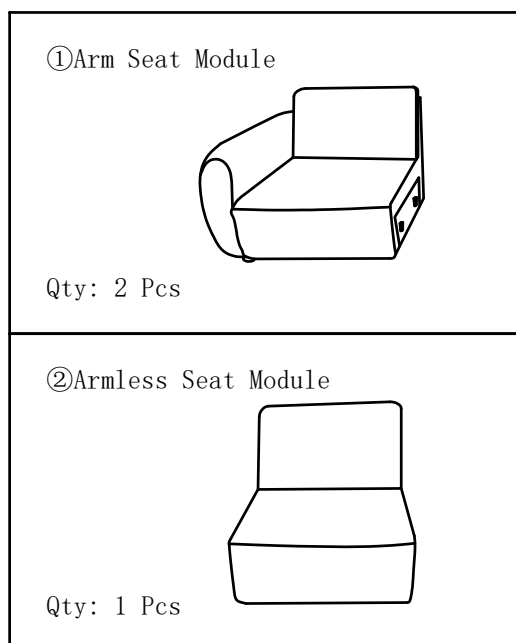

If you encounter any issues during unboxing or assembly, please contact us at any time.

Welcome Home

- ⚠ The package contains all necessary parts and hardware for assembling your power recliner sofa.
- ⚠ Please assemble the sofa according to the instruction. Ensure all connectors and components are fully connected BEFORE plugging into a power source.
- ⚠ Check all parts against the hardware list before discarding any packaging.
- ✉ If any parts are missing or damaged upon delivery, please contact us for an immediate replacement.

Main Components

Hardware & Parts List

Item	Illustration	Name	Quantity
A		1-to-3 Power Splitter Box	1 pc
B		Power Adapter	1 pc
C		Extension Cable	2 pcs
D		Power Cable	1 pc
E		Remote Control	1 pc

IMPORTANT NOTICE

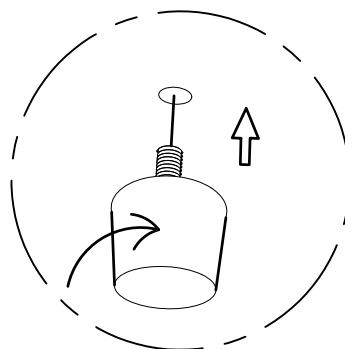

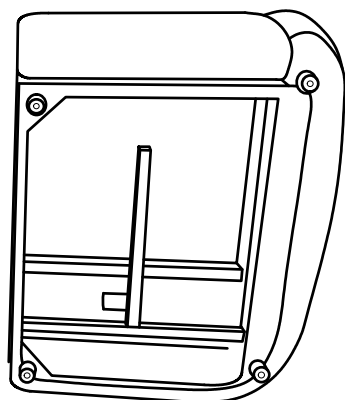

Assembly requires two adults.

This helps prevent personal injury or product damage during assembly.

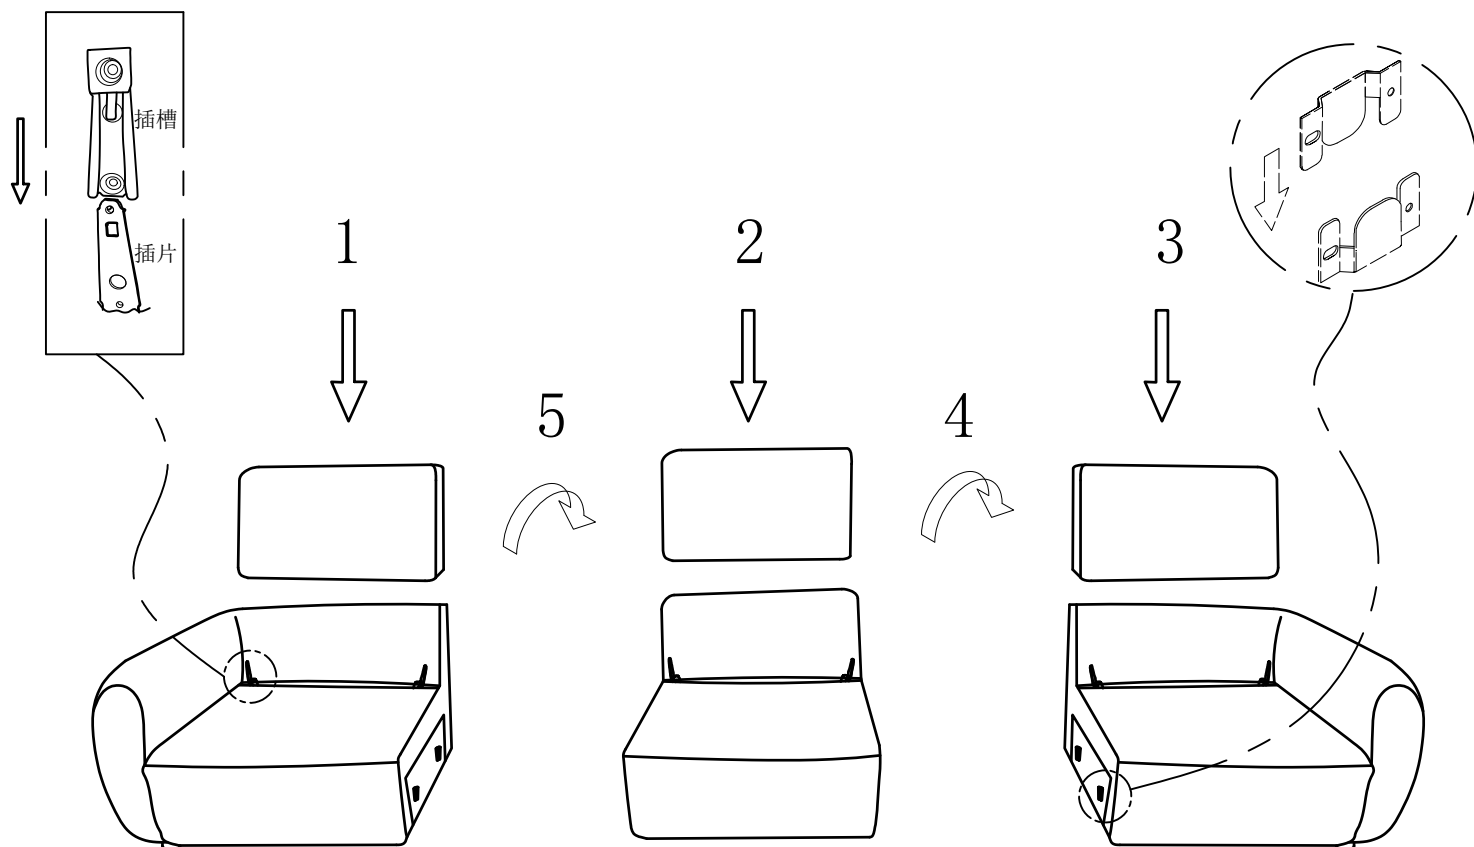

Step-by-Step Assembly Guide

Step 1 Install the Sofa Legs

 Two adults required

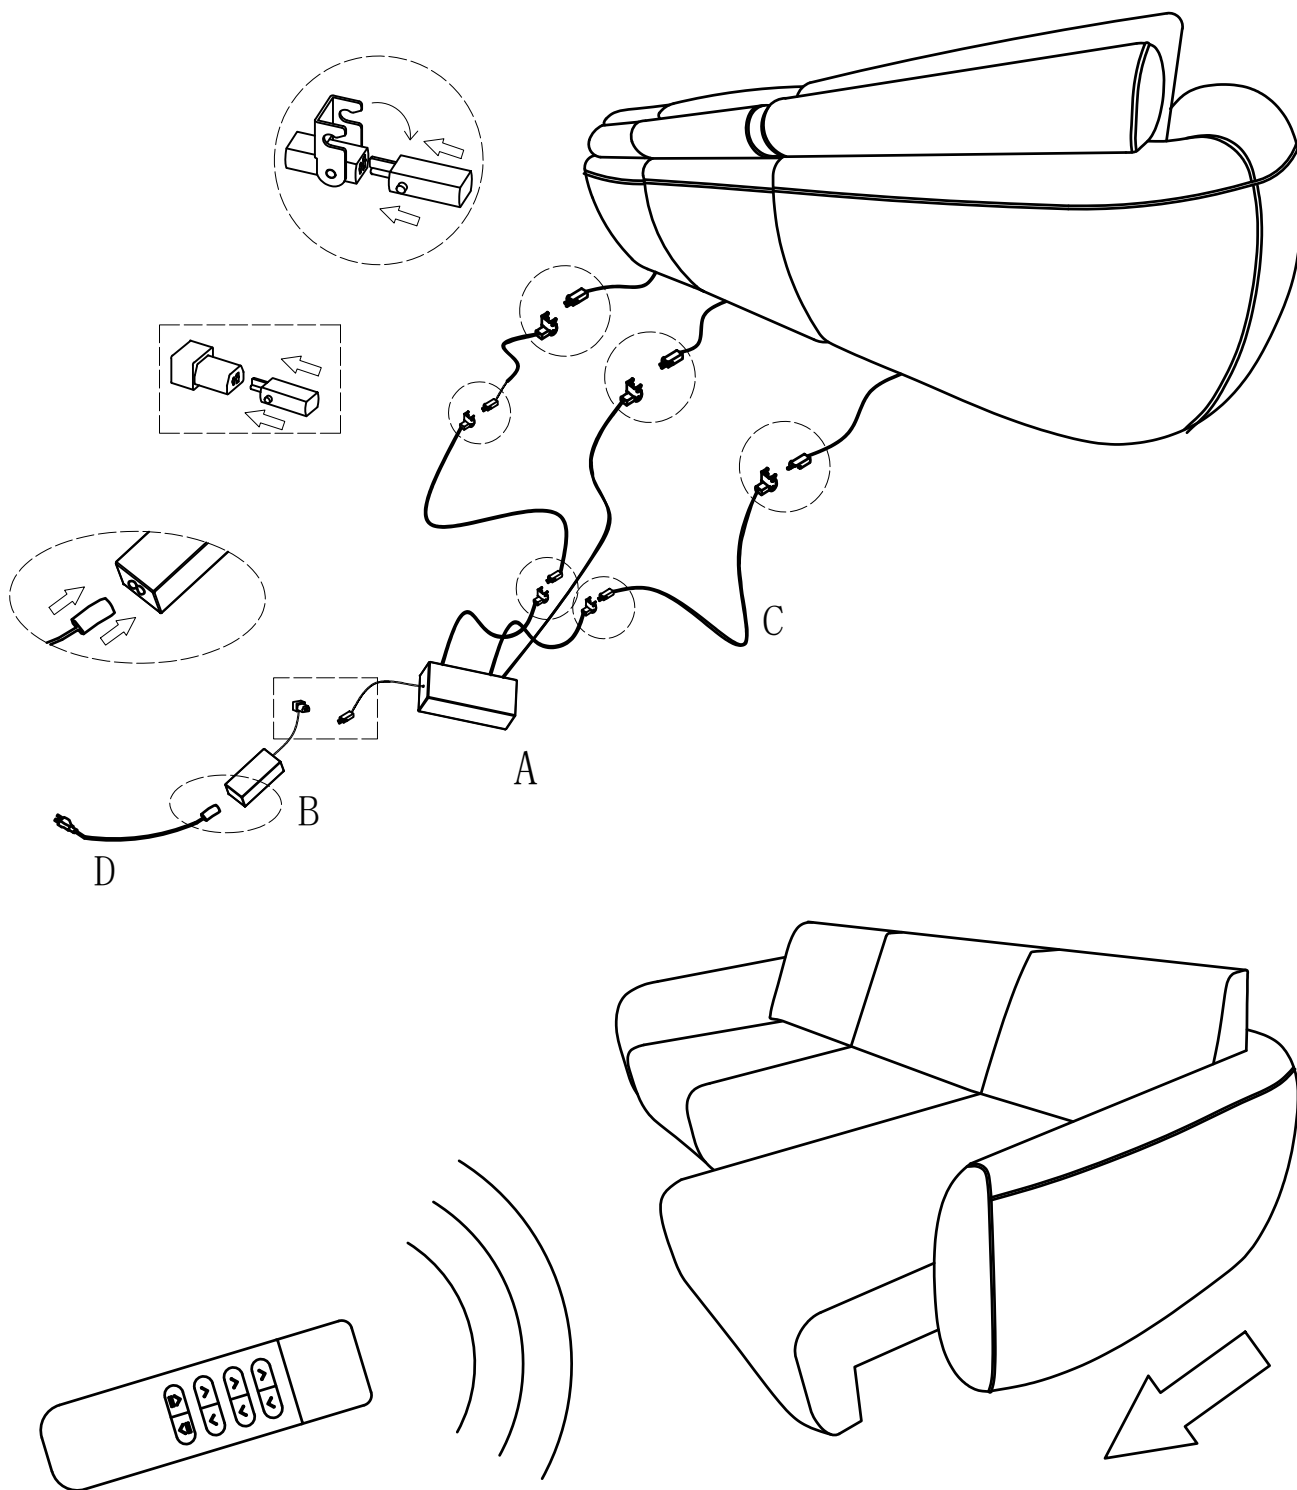

Step 2 Connect the Sofa Modules

Step 3

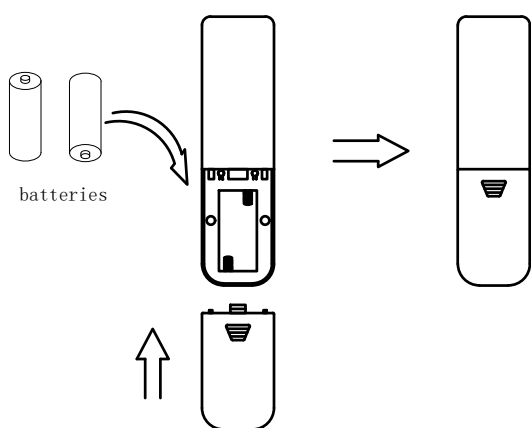

Connect the power cables and use the remote control to test the electric functions.

Remote Control Setup & User Guide

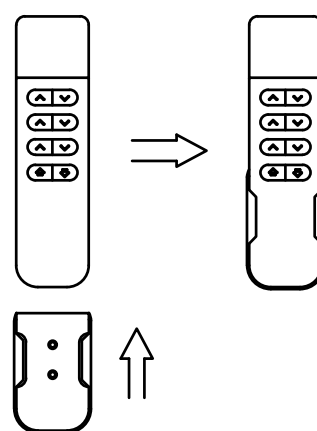

① Battery Installation

Install batteries into the remote control compartment as shown.

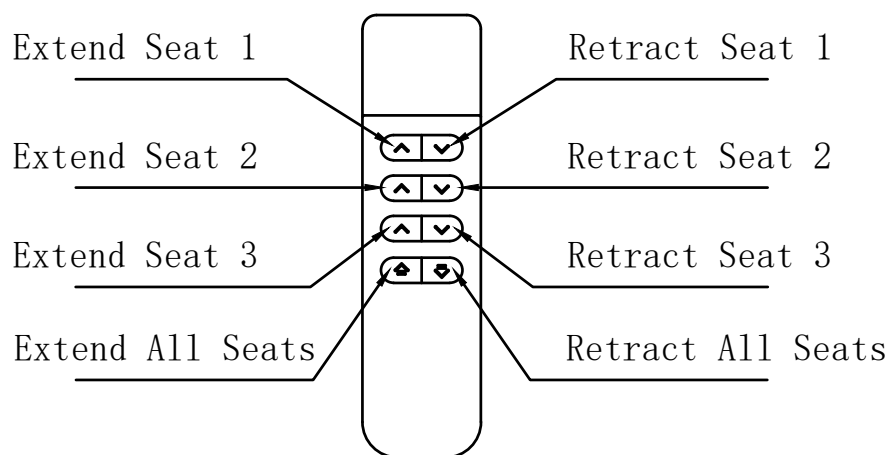

② Wall Mount Bracket Installation

Attach and position the wall-mount bracket according to your preference.

③ Remote Control Button Functions

Remote Control Pairing Instructions

- Pairing Function: Within 20 seconds of powering on the control box, press and hold the two buttons in the top row simultaneously for 5 seconds. Release the buttons once the red indicator light turns on. A flashing red light indicates successful pairing. If pairing times out before completion, restart the control box and repeat the process.
 - Note: One control box can only be paired with one remote control.
-

Motor Synchronization Instructions

- Standard Synchronization (Minor Speed Difference): No manual setup is required if speed differences are minimal. Simply press the All-Up or All-Down button. The control box will automatically adjust motor speeds to ensure all three sofa sections move at the same speed and reach full extension/retraction simultaneously.
- Note: Ensure all three sofa sections start from the same initial position.
- Advanced Calibration (Significant Speed Difference): Press and hold the All-Up and All-Down buttons simultaneously for 5 seconds. The three sofa sections will automatically extend and retract 3 times to complete calibration. Once completed, pressing the All-Up or All-Down button will operate all sections at synchronized speeds.
Note:
 - During the learning process, press any other button twice to stop the calibration.
 - If the control box loses power, the synchronization data will be erased. The calibration procedure must be performed again after power is restored.

Fabric Care & Maintenance Guide

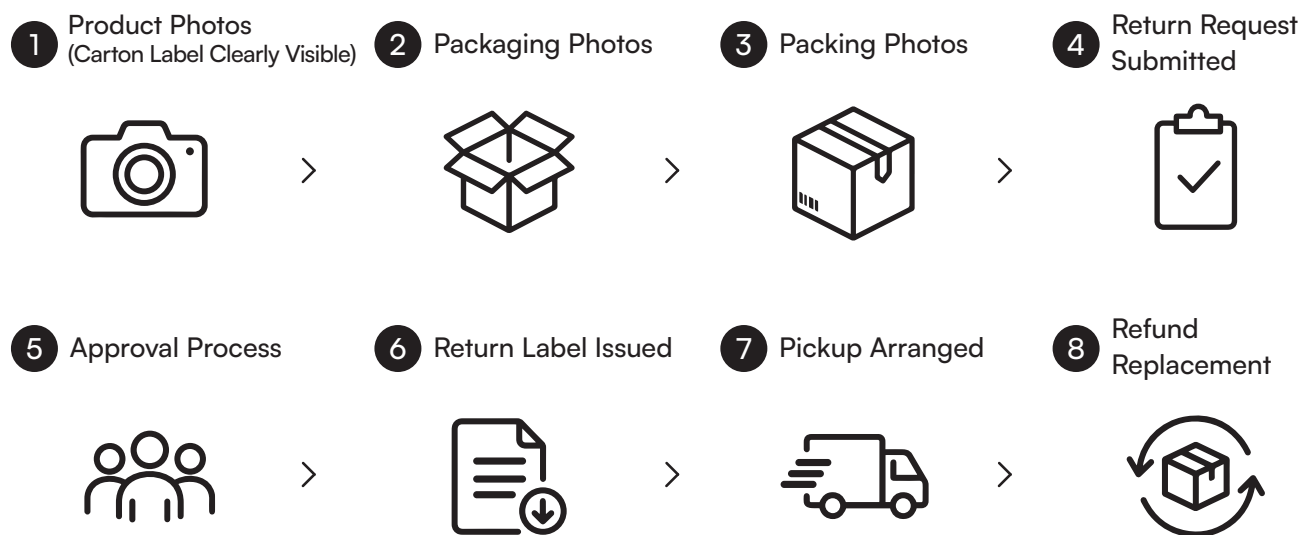

- Vacuum gently in the direction of the fabric pile using a soft brush attachment. Use a lint roller to remove pet hair. After cleaning, gently brush the pile to restore its smooth appearance.
- Avoid direct sunlight and keep the sofa away from direct airflow from air conditioners or heaters. During humid seasons, maintain proper indoor humidity to help prevent mold and mildew. Keep sharp objects such as jewelry and keys away from the fabric. If loose threads appear, carefully trim them with scissors—do not pull.
- Always clean by gently blotting. Do not rub or scrub back and forth. Allow the fabric to air dry completely in a shaded, well-ventilated area before brushing the pile.
- Food & Beverage Stains: Mix a small amount of mild neutral cleaner with warm water. Gently blot the stain with a clean cloth, then blot again with a water-dampened cloth to remove any detergent residue. Allow the fabric to dry completely before brushing.
- Do not use alcohol, bleach, hot water, or stiff-bristled brushes.

Common Fabric Issues & Solutions

- Flattened Fabric Pile: Use a garment steamer at a safe distance on a low heat setting to gently loosen the fibers. Allow the area to cool completely, then brush the pile back into place.
- Mold / Mildew: For minor mildew spots, gently dab the area with a diluted white vinegar solution and allow it to air dry completely in a well-ventilated area. For severe mold or mildew, professional upholstery cleaning is recommended.
- Large-Scale Stains: For extensive or stubborn stains, professional upholstery cleaning is recommended. Avoid repeated water-based cleaning, as excessive moisture may damage the fabric.

Return Process

8 Easy Steps

Helpful Tips

Keep all original packaging and accessories.

Ensure the item is properly packed before pickup.

Our support team will assist you throughout the process.
